

Purge Like a Pro

Isolation Pump Flanges with Purge Port and Swivel Flange

Watts® Series PIPFM1-Press Isolation Pump Flanges with Purge Port and Swivel Flange provide isolation to facilitate circulator pump replacement or repair. The integral purge port provides fast system purging.

Available in ¾"-2" sizes.

Features Include:

- Integral purge port saves time and money compared to purge stations made with a ball valve, boiler drain, and copper tee
- Purge port provides fast complete system purging
- Swivel flange allows purge port to be positioned for optimal purging convenience and provides for neat attractive installations
- Brass body and flange pressure rated to 250 psi (17 bar) WOG
- Stem seal is PTFE adjustable packing design
- Purge port has compact aluminum die cast handle for easy operation – purge port has a ¾" hose thread with cap
